It is often difficult to know for certain whether a particular patient needs to be nursed postoperatively in the intensive care unit (ICU), if

Post-intensive care syndrome (PICS). The mental health of family members may also be adversely affected ... Sun, 30 Jun 2013 23:53:00 GMT

Post-intensive care syndrome (PICS) - UPToDate - In the practice of medicine (especially surgery and dentistry), anesthesia or anaesthesia (from Greek "without sensation") is a state of temporary induced loss of sensation or awareness. It may include analgesia (relief from or prevention of pain), paralysis (muscle relaxation), amnesia (loss of memory), or unconsciousness. A patient under the effects of anesthetic drugs is referred to as being ... Tue, 29 May 2018 21:28:00 GMT

Anaesthesia - Wikipedia - Abstract. Tracheotomy is a common procedure in intensive care units, and nurses must provide proper care to tracheostomy patients to prevent complications. Sat, 26 May 2018 05:25:00 GMT

An Intensive Care Unit (ICU) is a specially staffed and equipped, separate -contained critical care medicine have resulted in a growing population of survivors of critical illness. Many survivors experience impairment in cognition, mental health, and physical function, known as post-intensive care syndrome (PICS). The mental health of family members may also be adversely affected ...
