

to simpler compounds. Chemical decomposition is usually regarded and defined as the exact opposite of chemical synthesis. Types of chemical reactions pdf - CP Chemistry Theodore Roosevelt High School Lab #1-5 Types of Chemical Reactions Lab Introduction During any chemical reaction, the Law of Conservation of Matter must be satisfied, James Baldwin Return to ChemTeam Main Menu ChemTeam: Balancing Equations & Reaction Types Electrochemistry is the branch of physical chemistry that studies the relationship between electricity, as a measurable and quantitative phenomenon, and identifiable chemical change, with either electricity considered an outcome of a particular chemical change or vice-versa. The general form of a synthesis reaction is $A + B \rightarrow AB$. Synthesis reactions "put things together". Because of the very high reactivities of sodium metal and chlorine gas, this ...
